

Got My Love (On Winter Days)

Sometimes it's hard to know
The things you have to do
Sometimes it's hard to see
The man that you can

But then he looks at you
Inside the window's glass
His pen is in his hand
His song is in the stars

That might be where we go
When we have lived our life
Done all that we can do
To stop from going mad

For no one knows where from
The voices that you hear
Come on and settle in
To make you talk aloud

About the pain you feel
Just walking up the stairs on winter days
Or sitting in your chair
Wishing you world away as if you could

But where there's hurt there's hope
Where there is dark there's light ahead of you
You've got my love tonight
And know you always will no matter what
