

## **She's In America Now**

I'm fifty-five  
I've got a daughter  
She's gone on tour way out West

I don't have a clue  
When she'll be back  
A ticket is too expensive

My daughter is so  
Beautiful you know  
When I see her I get happy

But when she goes home  
And leaves me alone  
I'm left feeling down in the dumps

She's in America now  
She's in America now

She once saw me play  
In front of my friends  
I wonder what she thought of it

She didn't say much  
About my album  
Or the songs I sung about her

Her mother and me  
We were in love once  
But those days are long gone away

I remember when  
she was a little girl  
The dreams that I had for her now

She's in America now  
She's in America now

Go

She's in America now  
She's in America now

She's in America now  
She's in America  
America now
