

What She Wants

If she says that she don't want to meet your mother
If she says that she don't want to meet your brother
If she says that she don't want to be your lover
Full time

If she says that she's not that kind of person
If she says that she is not a toy you control
If she says that she is not your kindred lost soul
You know

That she wants to be free and she wants to have fun
And the closer you get then the further she'll run
But we're all here to live and we're all gonna die
So stop wasting my money and stop wasting my time

If she wants just an inch but you give her a mile
If she wants an adult but you act like a child
If she just doing fine then it could be a crime
To help too much

For she wants to live now whilst she's still feeling young
So stop strangling her love by saying she's the one
But the more that you learn well the less that you know
And the need to have her closer is the seed to letting her go

If your going to Kent but she's going to Essex
If you give her the worst but she just wants the best bits
If you want her too much when all she wants is her lunch
Not your family
